

PREETI MALIK

FRONT-END WEB DEVELOPER

Crossing Republic Ghaziabad 
7015037997 
preetimalik54321@gmail.com 

OBJECTIVE

Experienced Web Developer with over 5+ years of expertise in crafting user-centric front-end interfaces and dynamic web applications. Proficient in HTML5, CSS3, JavaScript, and React.js, adept at creating responsive designs and ensuring cross-browser compatibility. Skilled in mentoring junior developers, collaborating across teams, and staying updated with emerging technologies to deliver high-quality solutions.

EXPERIENCE

Software Engineer | NeoSOFT

JULY 2024 – OCT 2025

ROLES & RESPONSIBLTY

- Worked closely with product owners, designers, and other stakeholders throughout the development process.
- Worked as a Front-end Developer on secure enterprise-grade applications using ReactJS and Next.js.
- Built and deployed scalable webpages and user interfaces using both class-based and functional components.
- Integrated REST APIs and managed application state using Redux Toolkit and Redux Toolkit Query.
- Ensured code quality through SonarQube and followed security-compliant practices.
- Wrote and maintained unit tests using Jest for reusable components.
- Participated in Agile development and collaborated with backend, QA, and design teams.

Sr. Software Developer | Nota Bene Global Solution Pvt Ltd

2019-2020/2021-2024

ROLES & RESPONSIBLTY

- Developed and maintained user-facing webpages using HTML, CSS, JavaScript, and ReactJS.
- Worked closely with product owners, designers, and other stakeholders throughout the development process.
- Created successful websites that met requirements for objectives such as load speed and design. Integrated front end code with server-side code to implement dynamic pages.
- Tested cross-browser compatibility of web applications in multiple browsers and operating systems.
- Optimized application for maximum speed and scalability by utilizing best practices such as minification and caching techniques.
- Resolved cross-browser compatibility issues for a consistent look across different platforms.
- Developed reusable components that can be used in future projects with minimal effort.
- Validated code for proper structuring, security and compatibility with different browsers, devices, or operating systems.
- Troubleshoot, tested, and remedied issues before software deployment.

Software Developer

2019-2020

ROLES & RESPONSIBLTY

- Converted PSD mockups into pure hand-written HTML and CSS pages.
- Developed a frontend for CMS. Integrated HTML, CSS, JavaScript, and other programming languages into webpages.
- Developed responsive designs that adapt to different screen sizes and devices.
- Tested cross-browser compatibility across various browsers such as Google Chrome, Firefox, Safari.
- Developed custom web application interfaces with HTML and CSS to meet client requirements.

Web Developer Associate | Accenture

2020-2021

ROLES & RESPONSIBLTY

- Designed, developed, and maintained multiple webpages and project modules using front-end technologies.
- Played a pivotal role in crafting customized email and web templates aligned with client branding and design guidelines.
- Employed HTML and CSS to develop responsive email templates, contributing to effective email marketing campaigns.
- Successfully adapted to evolving design and technical requirements from Client, demonstrating adaptability and responsiveness.
- Delivered high-quality email templates while meeting project deadlines.
- Collaborated with cross-functional teams, including designers and marketers, to transform design concepts into functional email templates.
- Conducted rigorous testing to ensure email template compatibility with various email clients, browsers, and devices.
- Implemented responsive design principles for mobile and desktop optimization.

PROJECTS

PANELIST SURVEY PORTAL – USER PANEL MANAGEMENT SYSTEM

Project description- Developed a multi-panel survey management system that allows different user types (panelists, admins, and coordinators) to participate in or manage various types of surveys. Implemented secure authentication, dynamic dashboards, real-time survey progress tracking, and a modular architecture for scalability. The system featured multiple onboarding flows, user query handling, calendar integration, and real-time notifications, providing a seamless experience across user roles through conditional rendering and role-based access.

Technology – Next.js (React Framework), TypeScript, Redux Toolkit, Material UI, REST API, Jest, Git

MEDED – MEDICAL EDUCATION PLATFORM

Project description- Developed a web-based education platform for medical students to access tailored learning materials and assessments. Implemented user authentication and role-based access to suggest courses based on education level and interests. Designed structured learning units containing study materials and interactive assessments to track student progress. Built using React.js (Class Components) and TypeScript, ensuring maintainable and scalable code. Integrated Material-UI for a modern and responsive user interface.

Technology – ReactJS, Material UI, Typescript, Git, Yarn, CSS

ERP – SCHOOL DATA MANAGEMENT SYSTEM

Project description- School data management system is a comprehensive platform facilitating efficient management of student and teacher data. It provides teachers with tools for grade management, attendance tracking, and class scheduling, while students can access their grades, attendance records, and family data. With separate logins for teachers and students, the system ensures secure access to relevant information, enhancing communication and transparency within the school community.

Technology – HTML5 CSS3, Bootstrap, JavaScript, Git, Jira

E-COMMERCE WEBSITE DEVELOPMENT

Project description - The objective of this project is to design, develop, and launch a comprehensive E-commerce website that provides a user-friendly and secure platform for customers to browse, purchase, and track products online. The website will aim to enhance customer satisfaction, increase sales, and establish a strong online presence for the brand.

Technology -HTML5, CSS3, React JS, React Hooks, Context API, Redux, REST API, CI/CD Pipelines, Jest and Enzyme

COURIER SERVICES SOFTWARE DEVELOPMENT

Project description- Courier services software solution that streamlines operations, enhances efficiency, and improves customer satisfaction for a courier service company. The software will automate various aspects of the courier service workflow, including order management, package tracking, route optimization, and reporting.

route planning, and enhance supply chain efficiency. Leveraged advanced technologies for real-time tracking, cost optimization, and improved customer satisfaction.

Technology – HTML5, CSS3, Bootstrap, JavaScript, Git, Jira

TECHNICAL SKILLS

- | | | |
|-----------------|---------------|--------------|
| • HTML5 | • CSS3 | • JavaScript |
| • ReactJS | • Bootstrap | • TypeScript |
| • Redux Toolkit | • Material UI | • Git |
| • NextJS | • SCSS | • Figma |

SOFT SKILL & STRENGTHS

- | | | |
|----------------------|---------------|-----------------|
| • Good Communication | • Multitasker | • Quick Learner |
| • Teamwork | • Leadership | • Adaptability |
| • Time management | | |

EDUCATION & CERTIFICATIONS

META Certification | Advance React: [Advanced React – by Meta](#)

B. Tech | Delhi Technical Campus, GGSIPU (2013-2017)

12th | Gita Vidya Mandir (2012)

10th | Gita Vidya Mandir (2010)
